

## Table of Contents

### **Interface Resistance and Thermal Transport in Nano-Confined Liquids**

*M. Barisik and A. Beskok*

### **Molecular Dynamics Simulations for Water-Metal Interfacial Thermal Resistance**

*Jerry Vera and Yildiz Bayazitoglu*

### **Convective Heat Transfer Enhancement with Nanofluids: A State-of-the-Art Review**

*Sadik Kakaç and A. Pramuanjaroenkij*

### **Heat Conduction in Nanofluids**

*J.L. Wang and X. Zhang*

### **Thermophysical Properties of Nanofluids**

*S. Özerinç, Sadik Kakaç, and A. Güvenç Yazicioğlu*

### **Stability of Nanofluids: Fundamentals, State-of-the-Art, and Potential Applications**

*E.B. Elçioğlu, E. Şimşek, and T. Okutucu-Özyurt*

### **Numerical Approaches for Convective Heat Transfer with Nanofluids**

*I. Sert, N. Sezer-Uzol, and Sadik Kakaç*

### **Heat Pipes and Nanotechnologies**

*Leonard L. Vasiliev and Leonid L. Vasiliev, Jr*

### **Nanofluid Flow Simulation as the Flow through the Porous Media**

*A. Tongkratoke, A. Pramuanjaroenkij, and Sadik Kakaç*

### **Convective Heat Transfer with Gaseous Flow in Microducts**

*A. Güvenç Yazicioğlu and Sadik Kakaç*

### **Numerical Simulation of Combined Microscale Effects on Convective Heat Transfer in Single-Phase Flows**

*Mourad Rebay, Y. Kabar, and Sadik Kakaç*

### **Numerical and Experimental Studies of Liquid and Gas Flow and Heat Transfer in Microchannel and Nozzle**

*Ya-Ling He and Wen-Quan Tao*

### **Analytical-Numerical Solutions for Conjugated Heat Transfer in Multistream Microsystems**

*J.L.Z. Zotin, D.C. Knupp, and Renato M. Cotta*

### **Direct-Inverse Problem Analysis in the Thermal Characterization of Microsystems**

*C.P. Naveira-Cotta*

### **Application of the Lattice Boltzmann Method (LBM) to Thermal Microflows**

*A.A. Mohamad and K.M. Issa*

### **Heat and Fluid Flow of Gases in Porous Media with Micropores: Slip Flow Regime**

*M. Mobedi, M. Barisik, and A. Nakayama*

### **Numerical Analysis of Subcooled Convective Boiling in Microchannels**

*Mourad Rebay, G. Mebarki, N. El Wakil, and A. Hamza*

### **Two-Phase Flow in Microchannels**

*N. Caney, H. Louahlia-Gualous, and A. Bontemps*
