

Contents of the Book “HEAT PIPES AND SOLID SORPTION TRANSFORMATIONS: FUNDAMENTALS AND PRACTICAL APPLICATIONS”

Preface.....	vii
Author.....	xi
Contributors.....	xv
1 A Review of Modeling Approaches to Heat and Mass Transfers in Porous Wicks.....	1
<i>Sassi Ben Nasrallah and Marc Prat</i>	
2 Thermally Powered Adsorption Cooling: Recent Trends and Applications.....	29
<i>B. B. Saha and I. I. El-Sharkawy</i>	
3 Optimisation of Adsorption Dynamics in Adsorptive Heat Transformers: Experiment and Modelling.....	63
<i>Yuri I. Aristov</i>	
4 Mechanisms of Intensive Heat Transfer for Different Modes of Boiling.....	109
<i>Yagov V. V.</i>	
5 A Review of Heat Pipe Practical Applications and Innovative Opportunities Application for Global Warming.....	145
<i>Masataka Mochizuki, Aliakbar Akbarzadeh and Thang Nguyen</i>	
6 Heat Pipes and Thermosyphons for Solid Sorption Machines and Fuel Cells Thermal Management.....	213
<i>L. L. Vasiliev and L. L. Vasiliev Jr.</i>	
7 Modelling of Heat and Mass Transfer in Sorption and Chemisorption Heat Converters and Their Optimisation.....	259
<i>L.L. Vasiliev, O.S. Rabinovich, N.V. Pavlyukevich and M.Yu. Liakh</i>	

8 Systems for Hydrogen Reach Gases Storage and Transportation with Heat Pipe Thermal Management.....	283
<i>L. L. Vasiliev and L. E. Kanonchik</i>	
9 Fundamental Questions of Closed Two-Phase Thermosyphons.....	319
<i>M. K. Bezrodny</i>	
10 Thermal Control Systems with Variable Conductance Heat Pipes for Space Application: Theory and Practice.....	357
<i>V. M. Baturkin</i>	
11 Thermosyphon Technology for Industrial Applications.....	411
<i>Marcia B. H. Mantelli</i>	
12 Fluid Flow and Heat Transfer with Phase Change in Minichannels and Microchannels.....	465
<i>V. V Kuznetsov and S. A. Safonov</i>
